8	18
9	19
10	20

TEACHER. — Review counting from one through twenty. Using objects, have the children count the teens by saying "one ten and one," "one ten and two," and so on. Lead them to discover that the sequence from one through nine remains the same, but that there is a *one* in front of each number which means "one ten."

Children are to write the numbers in the blank spaces.

Money

10 pennies = 1 dime
 1 dime = pennies
 1 dime is 1 ten

tens ones

ONE DIME	ONE CENT									¢
ONE DIME	ONE CENT	ONE CENT								¢
ONE DIME	ONE CENT	ONE CENT	ONE CENT							¢
ONE DIME	ONE CENT	ONE CENT	ONE CENT	ONE CENT						¢
ONE DIME	ONE CENT					¢				
ONE DIME	ONE CENT				¢					
ONE DIME	ONE CENT			¢						
ONE DIME	ONE CENT		¢							
ONE DIME	ONE CENT		¢							
ONE DIME	ONE DIME									

TEACHER.—Before doing this page, discuss with the children how much a lollypop costs, how much a candy bar costs, how much an ice cream cone costs, and so on, until the children realize that they can buy more for a dime than for a penny. Lead the children to see that one dime is *ten ones*, or *one ten*. Show them that the one-figure numbers, one through nine, are written in the ones column.

Children should write the number of dimes and cents illustrated in the proper blank spaces, saying "one ten and one more are eleven," and so on. Be sure they understand the ¢ sign.

Counting

	tens ones								
1		11		21		31		41	
2		12		22		32		42	
3		13		23		33		43	
4		14		24		34		44	
5		15		25		35		45	
6		16		26		36		46	
7		17		27		37		47	
8		18		28		38		48	
9		19		29		39		49	
10		20		30		40		50	

TEACHER.—Before doing this page, build a classroom chart from counting objects or dimes and pennies. Write each number on the chart as each object is counted. Lead children to hear the similarity in "four tens" and "for-ty," "five tens" and "fif-ty," and so on.

Children should count the number of tens and ones in each number above and place the numbers under the correct columns of spaces.

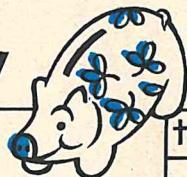

More Counting

	tens	ones										
51			61			71			81			91
52			62			72			82			92
53			63			73			83			93

1 and 8 are _____

and are _____

$$\begin{array}{r} 9 \\ + 1 \\ \hline 9 \end{array} \quad \begin{array}{r} 9 \\ + 1 \\ \hline 9 \end{array} \quad \begin{array}{r} 9 \\ + 1 \\ \hline 9 \end{array}$$

9 and 1 are _____

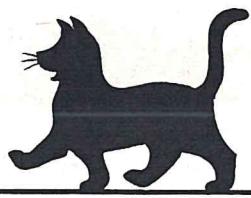

are _____

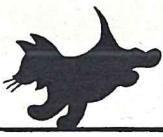

$$\begin{array}{r} 1 \\ + 9 \\ \hline 9 \end{array} \quad \begin{array}{r} 1 \\ + 9 \\ \hline 9 \end{array} \quad \begin{array}{r} 1 \\ + 9 \\ \hline 9 \end{array}$$

1 and 9 are _____

TEACHER. — Same directions as on the preceding page.

Addition

Mary had 5 cookies. Bob had 1 cookie.
Together they had ___ cookies.

$$\begin{array}{r} 8 \\ + 1 \\ \hline 9 \end{array}$$

This is called addition.

Add these numbers.

$$\begin{array}{r} 1 \\ 7 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 1 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 7 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 4 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ 1 \\ \hline \end{array}$$

$$\begin{array}{r} 5 \\ 1 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 9 \\ \hline \end{array}$$

$$\begin{array}{r} 3 \\ 1 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 2 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 8 \\ \hline \end{array}$$

$$\begin{array}{r} 4 \\ 1 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 5 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 6 \\ \hline \end{array}$$

$$\begin{array}{r} 9 \\ 1 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 3 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ 1 \\ \hline \end{array}$$

Counting Back

Count by 1 to 10.

1 ----- 10

Count from 10 back to 1.

10 ----- 1

Write the number that comes before each number.

Take Away

3 apples

Take away 1 apple.

$$\begin{array}{r} 3 \\ -1 \\ \hline \end{array}$$

3 take away 1 is

Take away 2 apples.

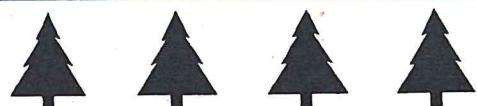

$$\begin{array}{r} 3 \\ -2 \\ \hline \end{array}$$

3 take away 2 is

These 3 numbers go together.

2 | 3

$$\begin{array}{r} 2 \\ +1 \\ \hline \end{array} \quad \begin{array}{r} 1 \\ +2 \\ \hline \end{array} \quad \begin{array}{r} 3 \\ -1 \\ \hline \end{array} \quad \begin{array}{r} 3 \\ -2 \\ \hline \end{array}$$

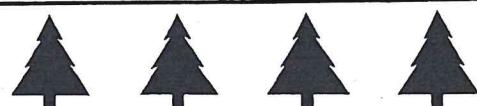

4 trees

Take away 1 tree.

$$\begin{array}{r} 4 \\ -1 \\ \hline \end{array}$$

4 take away 1 is

Take away 3 trees.

$$\begin{array}{r} 4 \\ -3 \\ \hline \end{array}$$

4 take away 3 is

These 3 numbers go together.

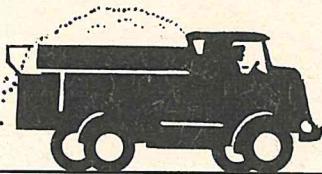

3 | 4

$$\begin{array}{r} 3 \\ +1 \\ \hline \end{array} \quad \begin{array}{r} 1 \\ +3 \\ \hline \end{array} \quad \begin{array}{r} 4 \\ -1 \\ \hline \end{array} \quad \begin{array}{r} 4 \\ -3 \\ \hline \end{array}$$

TEACHER.—Using objects, show the children that when they take away one, they have one less, and the answer is always the preceding number. Emphasize the three numbers that go together. Children should put an X on each of the objects they are to take away. Show the children a short way to write "take away." Explain the subtraction sign.

Take Away

SAND
FOR
SALE

5 balls

Take away 1 ball.

Problems

Jane had 4 jacks. She lost 3 jacks.
How many jacks did she have left?

$$\begin{array}{r} 4 \\ -3 \\ \hline \end{array}$$

Dick had 6 marbles. He lost 5 marbles.
How many marbles did he have left?

$$\begin{array}{r} 6 \\ -5 \\ \hline \end{array}$$

Mary had 5 dolls. She lost 4 dolls.
How many dolls did she have left?

$$\begin{array}{r} 5 \\ -4 \\ \hline \end{array}$$

7 birds were in a tree. 6 of the
birds flew away. How many birds
were left?

$$\begin{array}{r} 7 \\ -6 \\ \hline \end{array}$$

TEACHER. — Children should read these problems orally first. Then they should write in the answers.

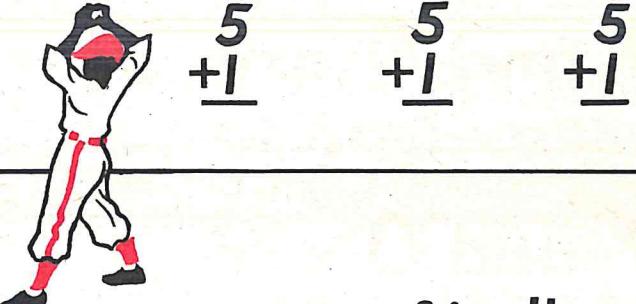

Adding Zero

Bob made 5 runs in a game of ball.

In the next game he made 1 more run.

How many runs did Bob make?

5 and 1 are

Mary made 7 runs in a game of ball.

In the next game she made nothing.

How many runs did Mary make?

7 and nothing are

$$\begin{array}{r} 7 \\ + 0 \\ \hline \end{array} \quad \begin{array}{r} 7 \\ + 0 \\ \hline \end{array} \quad \begin{array}{r} 7 \\ + 0 \\ \hline \end{array} \quad \begin{array}{r} 7 \\ + 0 \\ \hline \end{array}$$

O is nothing. Zero is nothing.
O is Zero. Zero is O.

Sam made 4 runs in a game of ball.

In the next game he made nothing.

How many runs did Sam make?

4 and nothing are

$$\begin{array}{r} 4 \\ + 0 \\ \hline \end{array} \quad \begin{array}{r} 4 \\ + 0 \\ \hline \end{array} \quad \begin{array}{r} 4 \\ + 0 \\ \hline \end{array}$$

4 and 0 are

TEACHER. — Before beginning the work on this page, use objects to demonstrate the difference between adding one more and adding nothing more.

Adding Other Zero Numbers

5 and 0 are, so 0 and 5 are

7 and 0 are, so 0 and 7 are

2 and 0 are, so 0 and 2 are

4 and 0 are, so 0 and 4 are

1 and 0 are, so 0 and 1 are

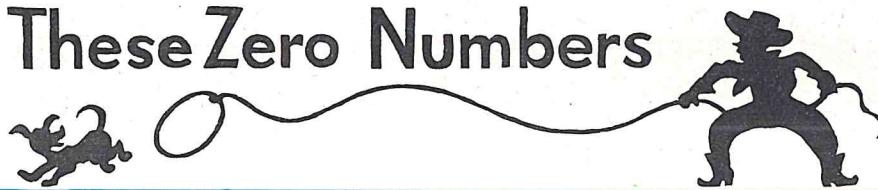

9 and 0 are, so 0 and 9 are

6 and 0 are, so 0 and 6 are

3 and 0 are, so 0 and 3 are

8 and 0 are, so 0 and 8 are

Add These Zero Numbers

$$\begin{array}{r} 0 \\ 7 \\ \hline \end{array} \quad \begin{array}{r} 1 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 0 \\ 2 \\ \hline \end{array} \quad \begin{array}{r} 5 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 0 \\ 8 \\ \hline \end{array}$$

$$\begin{array}{r} 0 \\ 4 \\ \hline \end{array} \quad \begin{array}{r} 8 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 7 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 0 \\ 9 \\ \hline \end{array} \quad \begin{array}{r} 2 \\ 0 \\ \hline \end{array}$$

$$\begin{array}{r} 4 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 0 \\ 5 \\ \hline \end{array} \quad \begin{array}{r} 3 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 0 \\ 6 \\ \hline \end{array} \quad \begin{array}{r} 9 \\ 0 \\ \hline \end{array}$$

$$\begin{array}{r} 0 \\ 3 \\ \hline \end{array} \quad \begin{array}{r} 0 \\ 1 \\ \hline \end{array} \quad \begin{array}{r} 6 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 0 \\ 0 \\ \hline \end{array} \quad \begin{array}{r} 8 \\ 0 \\ \hline \end{array}$$

$$\begin{array}{r} 1 \\ 8 \\ \hline \end{array}$$

Subtracting Zero

Tom had 5 pennies. He spent 5 pennies.
How many pennies did he have left?.....

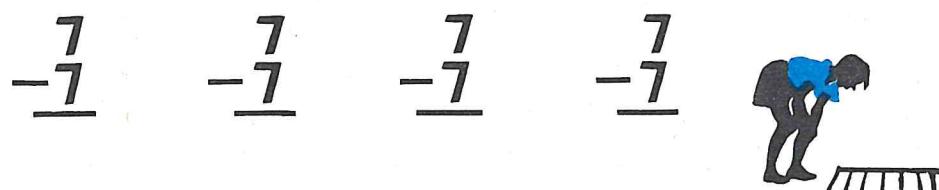

$$\begin{array}{r} 5 \\ -5 \\ \hline \end{array} \quad \begin{array}{r} 5 \\ -5 \\ \hline \end{array} \quad \begin{array}{r} 5 \\ -5 \\ \hline \end{array} \quad \begin{array}{r} 5 \\ -5 \\ \hline \end{array}$$

Judy had 5 pennies. She spent nothing.
How many pennies did she have left?.....

$$\begin{array}{r} 5 \\ -0 \\ \hline \end{array} \quad \begin{array}{r} 5 \\ -0 \\ \hline \end{array} \quad \begin{array}{r} 5 \\ -0 \\ \hline \end{array} \quad \begin{array}{r} 5 \\ -0 \\ \hline \end{array}$$

Jim had 7 marbles. He lost his 7 marbles.
How many marbles did he have left?.....

Betty had 7 marbles. She lost none of her marbles. How many marbles did she have left?.....

$$\begin{array}{r} 7 \\ -0 \\ \hline \end{array} \quad \begin{array}{r} 7 \\ -0 \\ \hline \end{array} \quad \begin{array}{r} 7 \\ -0 \\ \hline \end{array} \quad \begin{array}{r} 7 \\ -0 \\ \hline \end{array}$$

TEACHER. — Use objects to show how many are left when none are taken away from a specific number, and when the whole amount is taken away.

Children should read the page orally, then write in the answers.

Subtracting Other Zero Numbers

7 take away 7 is , so 7 take away 0 is

9 take away 9 is , so 9 take away 0 is

4 take away 4 is , so 4 take away 0 is

1 take away 1 is , so 1 take away 0 is

3 take away 3 is , so 3 take away 0 is

6 take away 6 is , so 6 take away 0 is

8 take away 8 is , so 8 take away 0 is

2 take away 2 is , so 2 take away 0 is

5 take away 5 is , so 5 take away 0 is

$$\begin{array}{r} 12 \\ - 6 \\ \hline \end{array}$$

TEACHER. — The children may make separate practice cards on heavier paper by using this page as a pattern. On one side they should write the combination, on the reverse its answer. These cards are to be used as practice cards. The children should study the various combinations by themselves. After sufficient time is allowed, they may then test their neighbors and have their neighbors test them. Encourage the children to teach themselves by learning the answers without having to count to find the answer. The teacher should then test the children. When the teacher is satisfied that the children know these combinations, she may ask them to color the picture for Set 1 on the chart on page 126.

Write the Answers

The Parade

Color the first clown yellow.

Color the third clown blue.

Color the second clown green.

Color the fifth clown red.

Color the fourth clown brown.

The second clown is green.

The fifth clown is _____.

The third clown is _____.

The first clown is _____.

The fourth clown is _____.

Write the words.

first _____

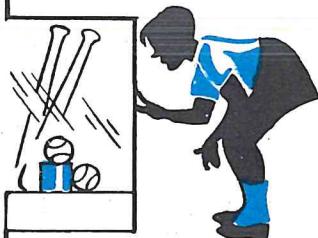

TEACHER. — The children should read this page orally before completing the work.

Adding a New Way

SPORTING
GOODS

Tom had 3 balls. He bought one more ball. How many balls did Tom have?

3 balls and 1 ball are

3 and 1 are

$3 + 1 =$

Sue ate 2 cookies. She ate one more cookie. How many cookies were there?

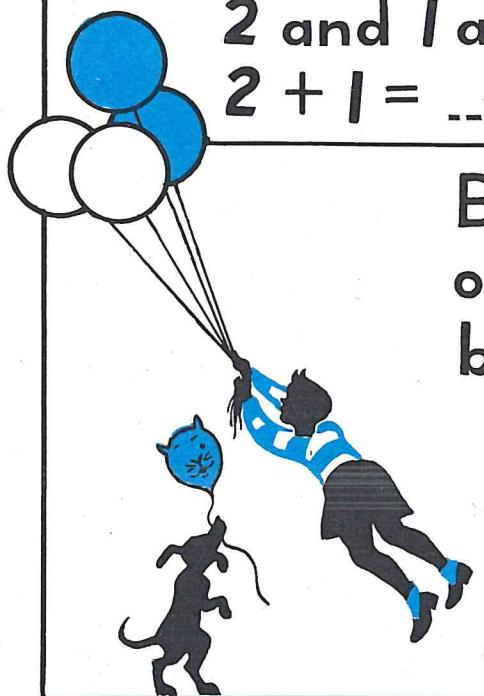

2 cookies and 1 cookie are

2 and 1 are

$2 + 1 =$

Bob had 4 big balloons and one small balloon. How many balloons did Bob have?

4 balloons and 1 balloon are

4 and 1 are

$4 + 1 =$

TEACHER. — The children should read this page orally before completing the work.

Write the Answers

$5 + 5 = \underline{\quad}$

$5 + \underline{\quad} = 10$

$7 + 7 = \underline{\quad}$

$7 + \underline{\quad} = 14$

$6 + 0 = \underline{\quad}$

$6 + \underline{\quad} = 6$

$9 + 9 = \underline{\quad}$

$9 + \underline{\quad} = 18$

$1 + 8 = \underline{\quad}$

$1 + \underline{\quad} = 9$

$0 + 4 = \underline{\quad}$

$0 + \underline{\quad} = 4$

$9 + 1 = \underline{\quad}$

$9 + \underline{\quad} = 10$

$8 + 8 = \underline{\quad}$

$8 + \underline{\quad} = 16$

The Twelve Months

There are months.

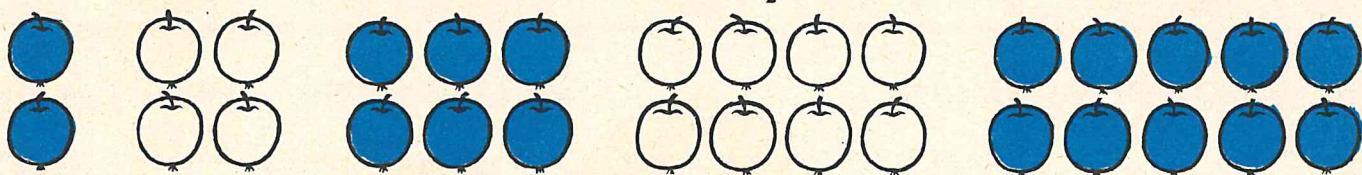

The first month is

The 12th month is

February is in Winter—Summer.

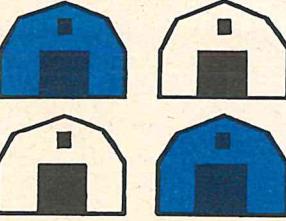

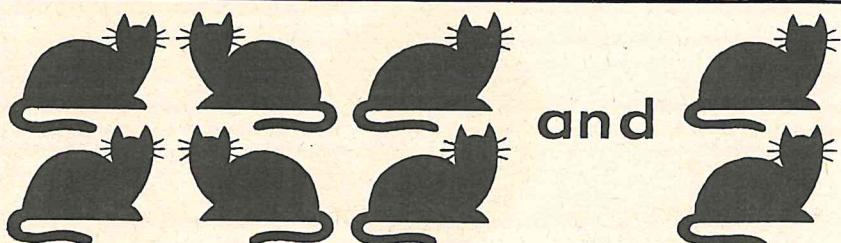

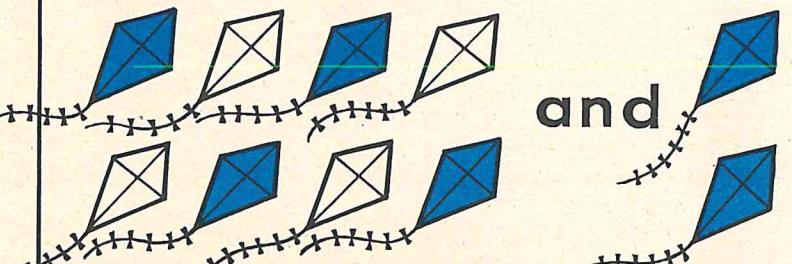

July is in Winter—Summer.

Count by 2's

2, 4, 6, 8, 10 are called even numbers.

Write the even numbers.

 <p>and are</p> <p>$\begin{array}{r} 4 \\ +2 \\ \hline \end{array}$ $\begin{array}{r} 4 \\ +2 \\ \hline \end{array}$ $\begin{array}{r} 4 \\ +2 \\ \hline \end{array}$</p> <p>4 and 2 are</p>

Problems

Jim had 10 cookies. He ate 2 cookies.
How many cookies did he have left?

Bob had 8 tops. He bought 2 more
tops. How many tops did he have then?

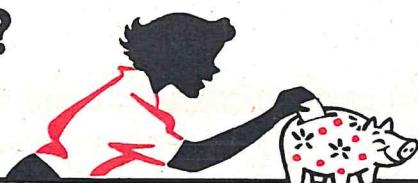

Jane had 7 birds. One day 5 birds
flew away. How many birds were left?

Mary had 5 dollars. Mother gave her 2
more dollars. How many dollars did Mary
have?

\$ -----

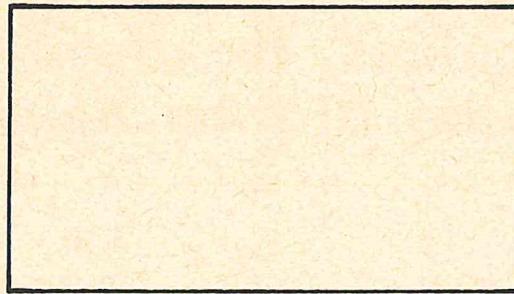

Ann had 7 books. She read 2 of them.
How many more books does she have
to read?

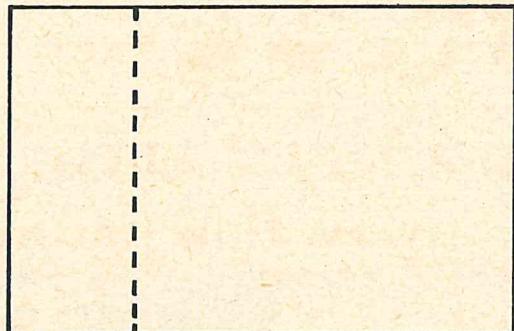

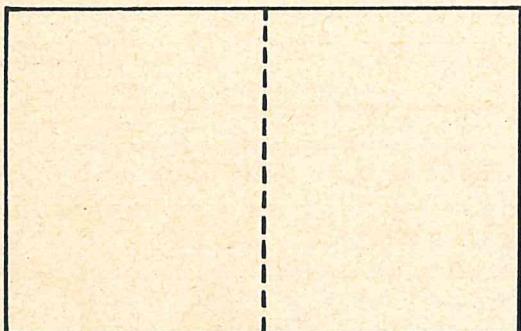

TEACHER. — Allow the class to read these problems orally. They may then write in the correct answers.

One Half $\frac{1}{2}$

You have been given a piece of paper like this.
Fold your paper into 2 parts.

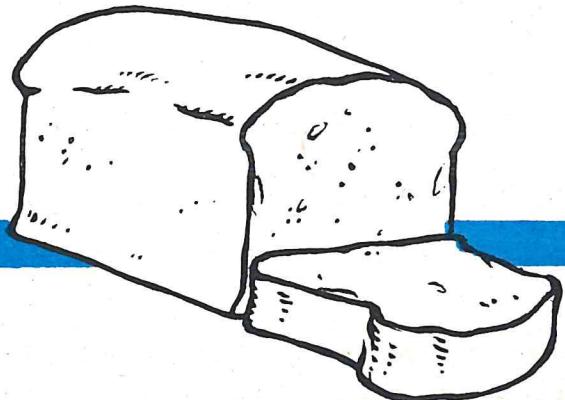

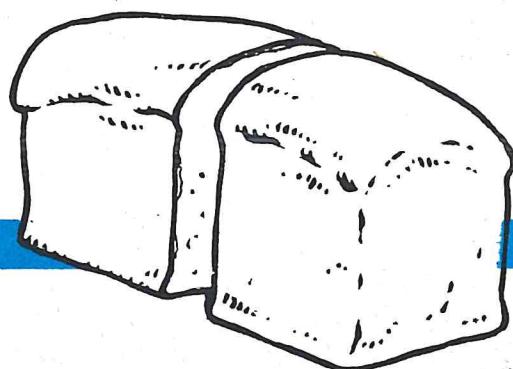

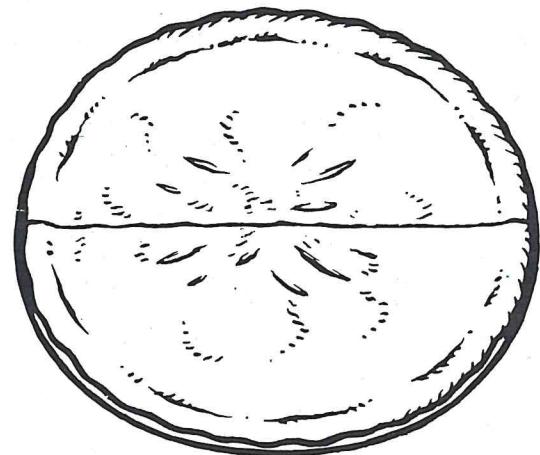

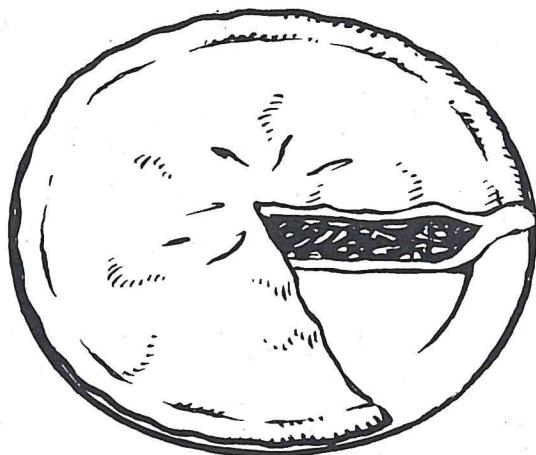

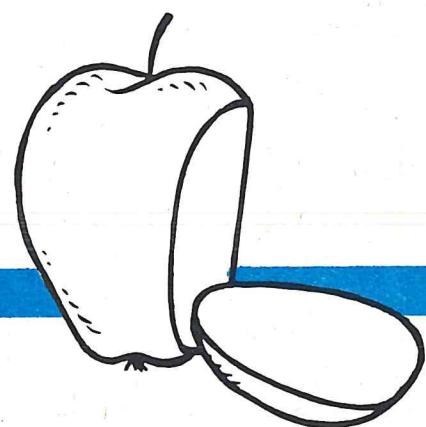

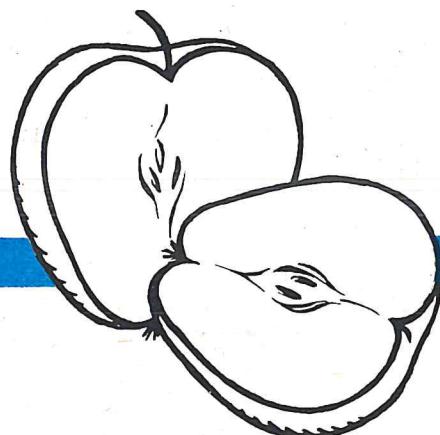

Tom folded his paper like this.
Each part is $\frac{1}{2}$
Write $\frac{1}{2}$ in each part.

Mary folded her paper like this.
Is each part $\frac{1}{2}$?
Why?

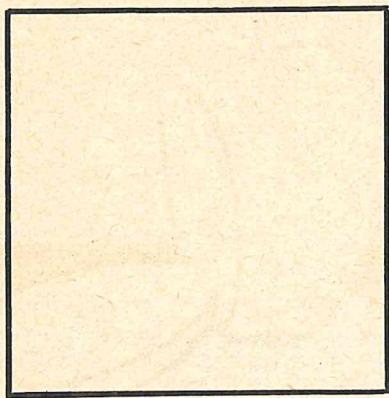

When we divide something into 2 parts which are the same size, each part is called one half.
One half is written $\frac{1}{2}$

TEACHER. — Give each child a piece of paper and ask to have it folded into two parts. Hold up the papers of different children, and let the class decide which are folded in half and why.
The children are to read this page orally.

Which are cut in half? Color only the halves.

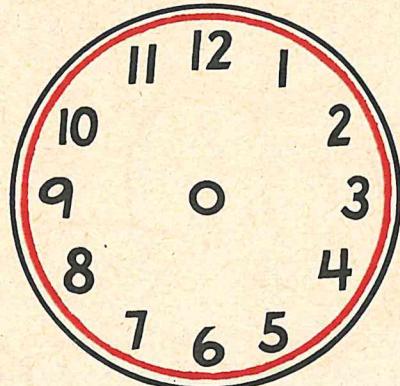

One Half $\frac{1}{2}$

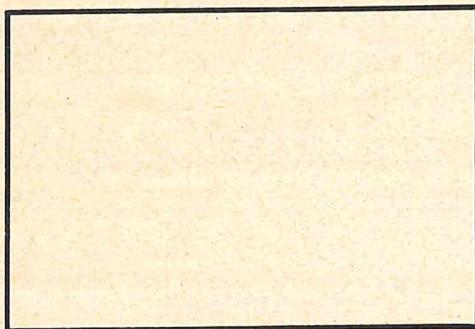

Draw a line to make 2 halves.

Write $\frac{1}{2}$ in each part.
Color $\frac{1}{2}$ of the square.

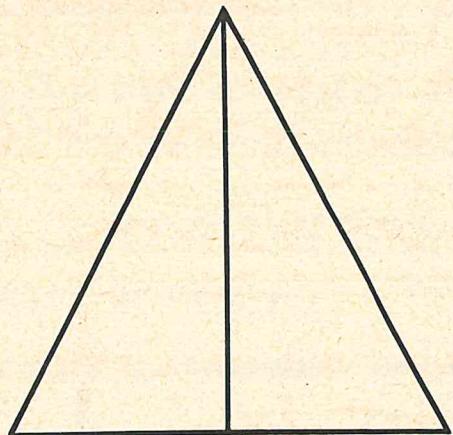

Draw a line from the 12 to the 6 to make 2 halves.

Write $\frac{1}{2}$ in each part.
Color $\frac{1}{2}$ of the clock.

Draw a line to make 2 halves.

Write $\frac{1}{2}$ in each part.
Color $\frac{1}{2}$ of the rectangle.

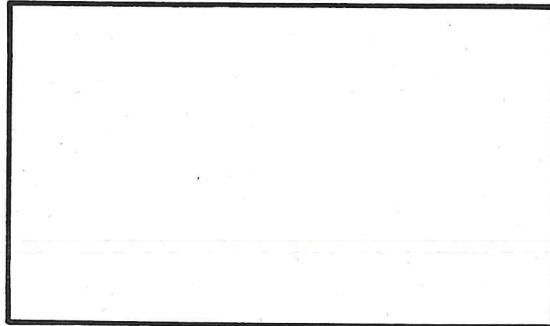

The line makes 2 halves.

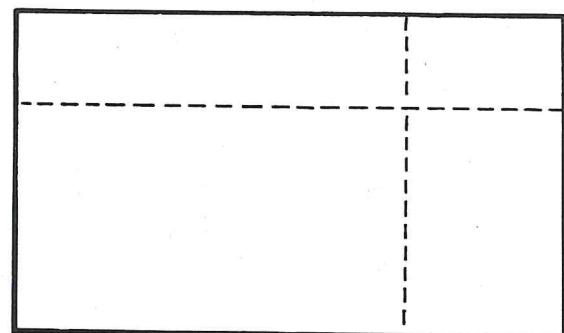

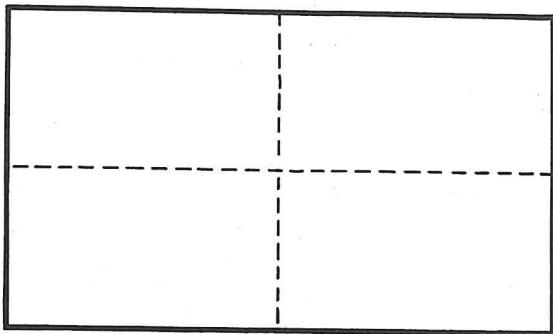

Write $\frac{1}{2}$ in each part.
Color $\frac{1}{2}$ of the triangle.

TEACHER. — Allow the children to discuss the difference in shape of the square, circle, rectangle, and triangle.
The children are to read this page orally.

One Fourth $\frac{1}{4}$

You have been given a piece of paper like this.
Fold your paper into 4 parts.

Bob folded his paper like this.

Each part is $\frac{1}{4}$

Write $\frac{1}{4}$ in each part.

Jane folded her paper like this.

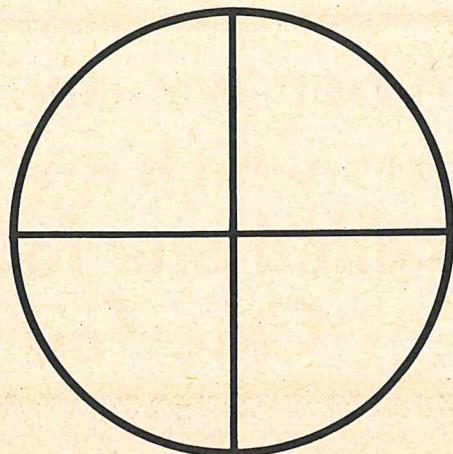

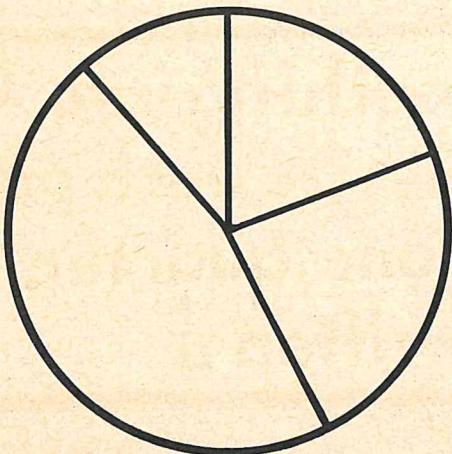

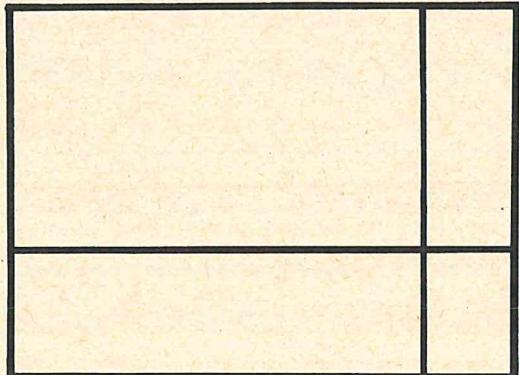

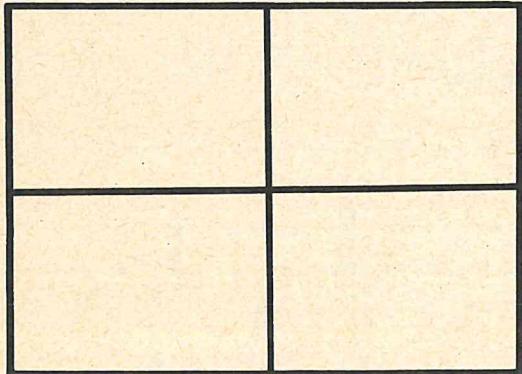

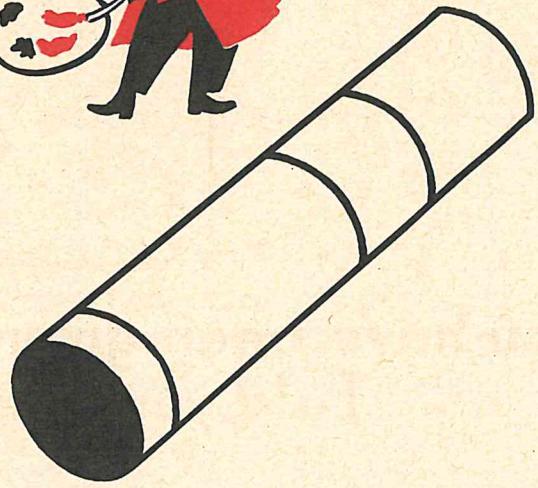

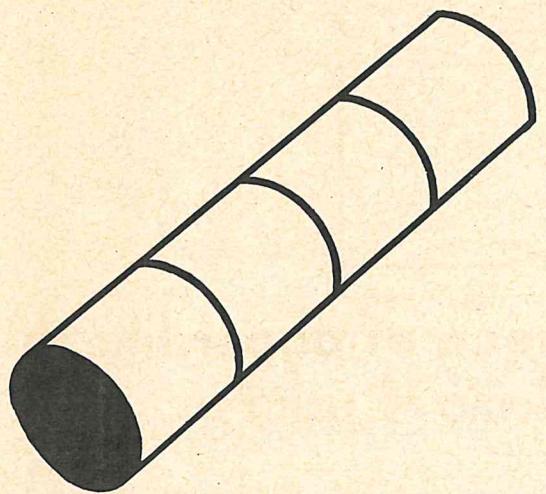

Is each part a $\frac{1}{4}$?

Why?

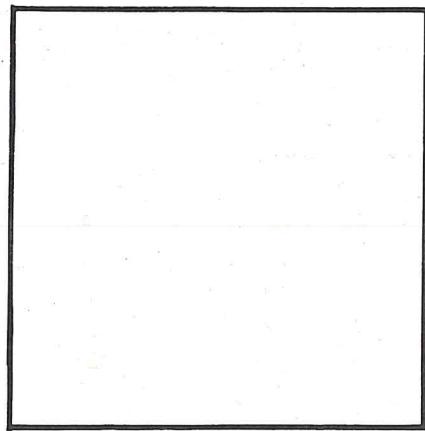

When we divide something into 4 parts which are the same size, each part is called one fourth or one quarter.
One fourth is written $\frac{1}{4}$

TEACHER. — Give each child a piece of paper and ask to have it folded into four parts. Hold up the papers of different children and let the class decide which are folded into fourths and why.
The children are to read this page orally.

Which are cut into fourths? Color only the fourths.

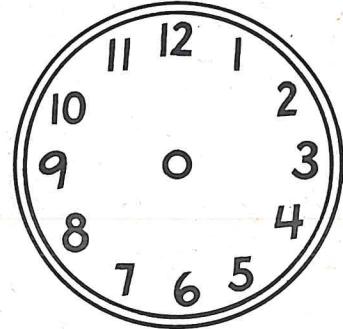

One Fourth $\frac{1}{4}$

Draw lines to make
4 fourths.

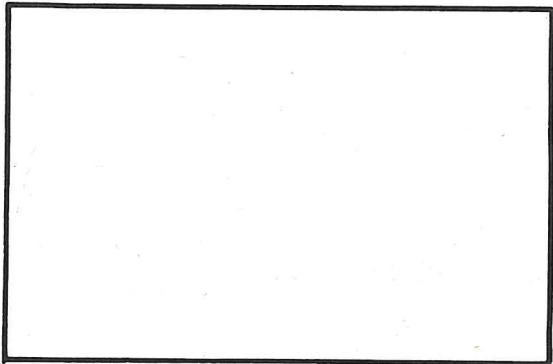

Write $\frac{1}{4}$ in each part.
Color $\frac{1}{4}$ of the square.

Draw a line from the
12 to the 6

Draw a line from the
9 to the 3

Write $\frac{1}{4}$ in each part.
Color $\frac{1}{4}$ of the clock.

Draw lines to make
4 fourths.

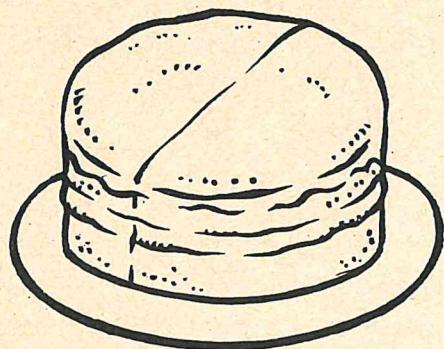

Write $\frac{1}{4}$ in each part.
Color $\frac{1}{4}$ of the rectangle.

Draw lines to make
4 fourths.

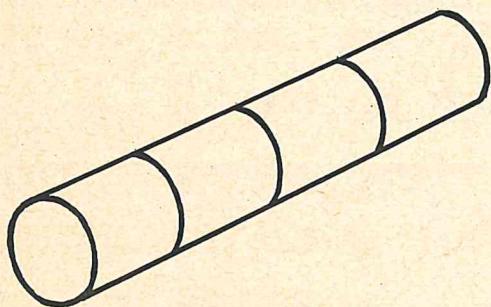

Write $\frac{1}{4}$ in each part.
Color $\frac{1}{4}$ of the cake.

Draw a line around the right answer.
Color the pictures.

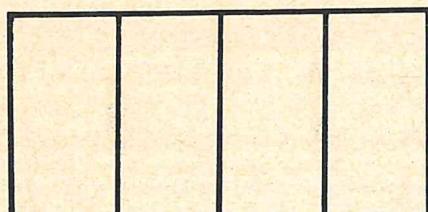

Each part of this cake is —

$$\frac{1}{4} \quad \frac{1}{2}$$

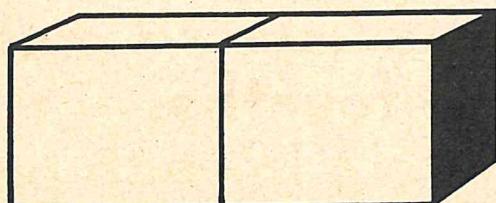

Each part of this candy is —

$$\frac{1}{4} \quad \frac{1}{2}$$

Each part of this rectangle is —

$$\frac{1}{4} \quad \frac{1}{2}$$

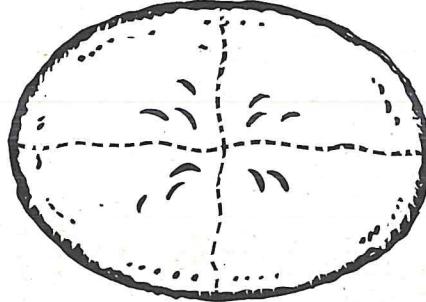

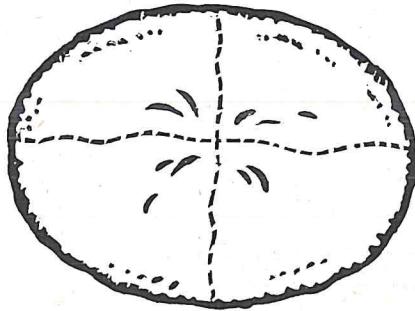

Each part of this box is —

$$\frac{1}{4} \quad \frac{1}{2}$$

How Big?

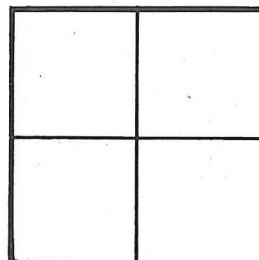

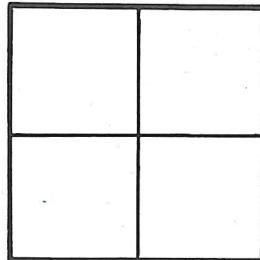

Which is larger? Which is smaller?

Color $\frac{1}{2}$ of this pie. Color $\frac{1}{4}$ of this pie.

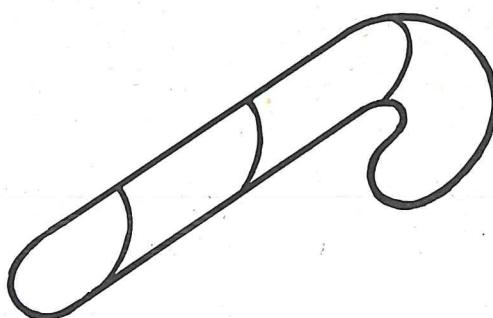

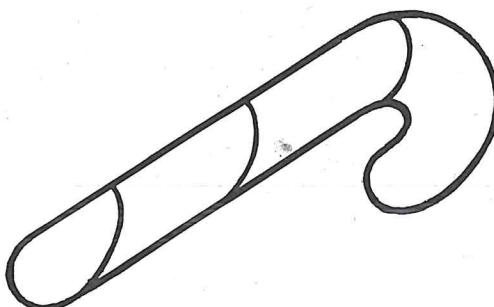

Which is larger? $\frac{1}{4}$ $\frac{1}{2}$

Color $\frac{1}{4}$ of this square. Color $\frac{1}{2}$ of this square.

Which is smaller? $\frac{1}{4}$ $\frac{1}{2}$

Color $\frac{1}{2}$ of this candy. Color $\frac{1}{4}$ of this candy.

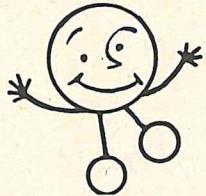

Which is larger? $\frac{1}{4}$ $\frac{1}{2}$

TEACHER. — As examples, use objects or the pupils themselves to demonstrate the meaning of larger and smaller. The children are to read this page orally. They should then draw a line around each correct answer.

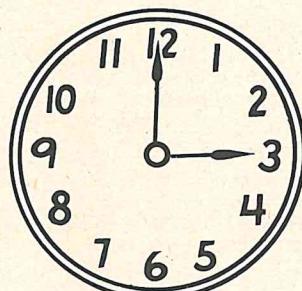

Can You Tell Time?

A Riddle - What has a face and 2 hands, but no body?

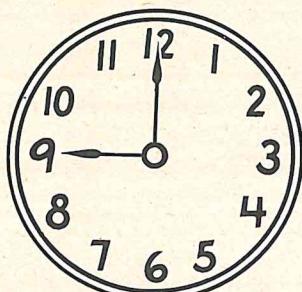

A clock has a face and 2 hands.
It has a long hand and a short hand.

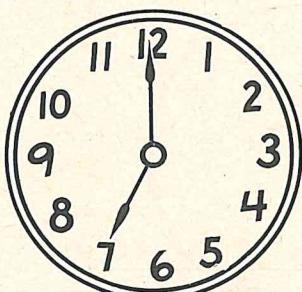

The long hand is the minute hand.
The short hand is the hour hand.

The long minute hand is at 12
The short hour hand is at
It is 3 o'clock.

The long minute hand is at 12
The short hour hand is at
It is o'clock.

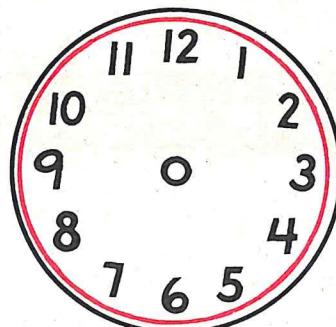

The long minute hand is at
The short hour hand is at
It is o'clock.

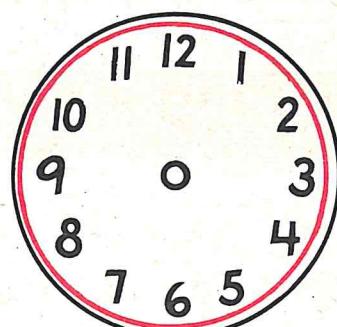

TEACHER. — The children should make clocks of paper plates or cardboard. The hands may be fastened with a round head fastener, so that the hands can move. Have the children write the hours on their clocks.
The children should read this page orally, and then fill in the blanks in the boxes.

When the long minute hand is
at 12 the clock says o'clock.

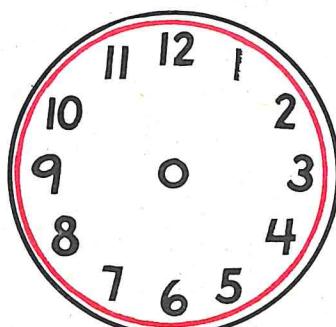

Draw the hands so the clocks will tell time.

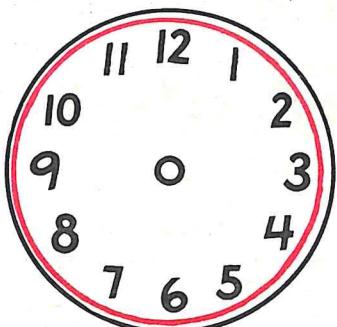

4 o'clock

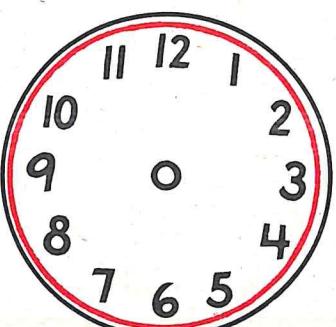

8 o'clock

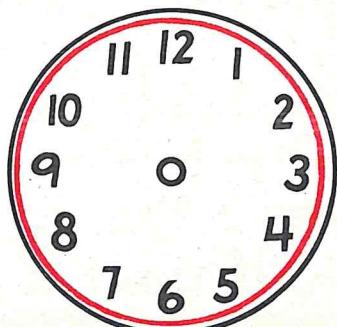

10 o'clock

6 o'clock

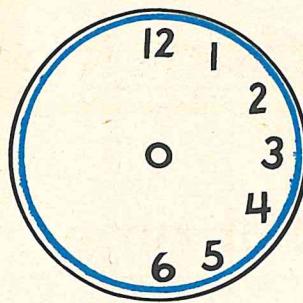

7 o'clock

2 o'clock

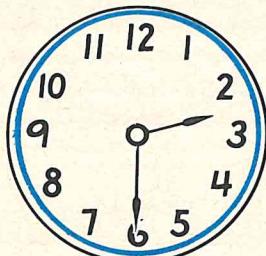

Half Past

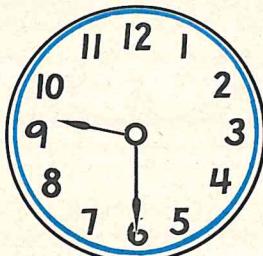

Draw a line from the 12 to the 6 to make 2 halves.
Each part is
Color the half where the numbers are.

The long minute hand starts at the 12.
It goes around and around the clock.
When it gets to the 6, it has gone half way
around the clock.
Draw the long minute hand at the 6 with
your black crayon.

When the long minute hand is at the 6 the clock says half past.

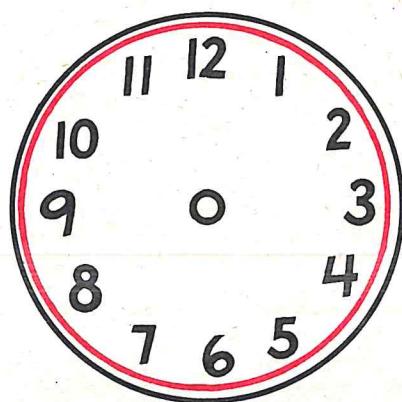

The long minute hand
is at the 6
The short hour hand
is past the
It is half past 2

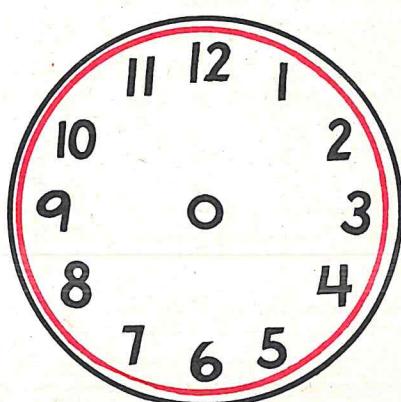

The long minute hand
is at the
The short hour hand
is past the
It is half past

TEACHER. — Show the children the direction in which the hands move. Let them move the long hand all around the clock to make a complete circle, then halfway round to the six, starting always at the twelve. Direct their attention to the short hand, and be sure that they understand why it is always past one number and on the way to the next number.

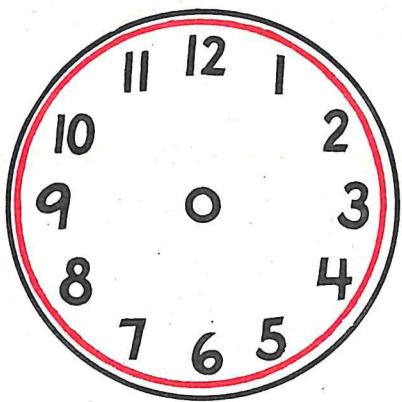

Draw the hands so the clock says —

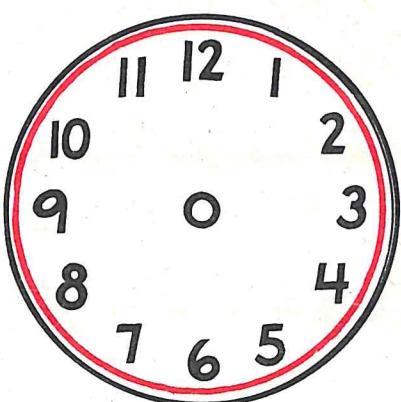

half past 4

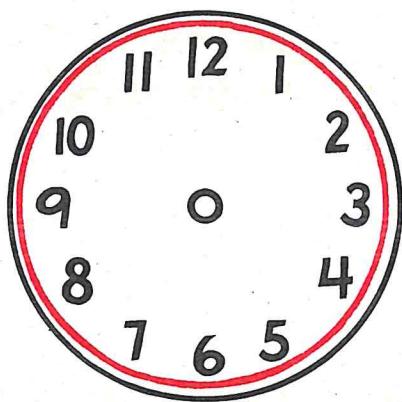

half past 7

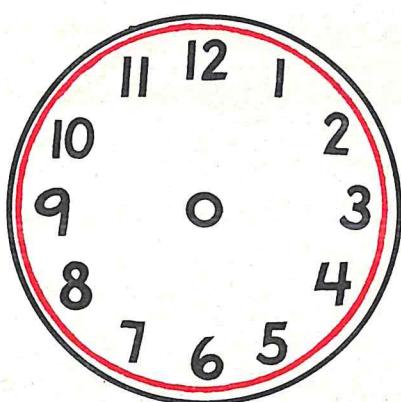

half past 9

half past 3

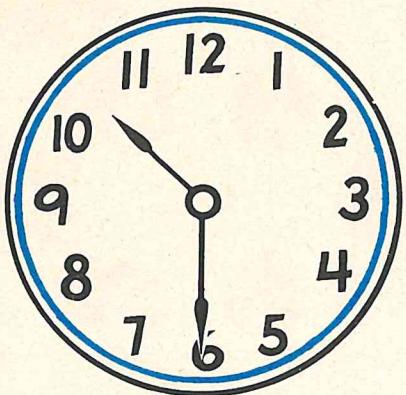

half past 2

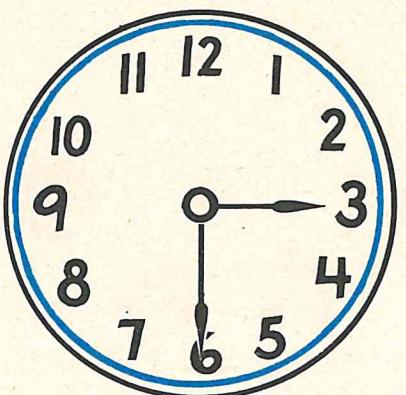

half past 12

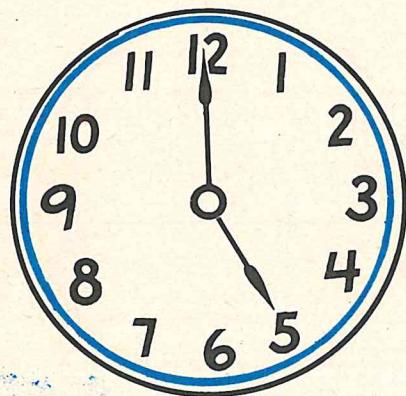

What time is it ?

$$\begin{array}{r} 97 \\ - 24 \\ \hline \end{array}$$

TEACHER. — Demonstrate on the board how to check, by covering the minuend with the hand, then adding the subtrahend and the answer to get the minuend.

Let the children do several examples on the board and then check them to see if they are correct.

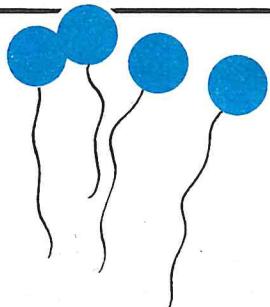

Problems

Bill bought an ice cream cone for 6¢ and candy for 3¢. How much did Bill spend ?

-----¢

Jill needs 10 balloons .
She has 4 balloons . How
many more does she need ?

Nan has 5 little dolls and 4 big
dolls . How many dolls does
she have in all ?

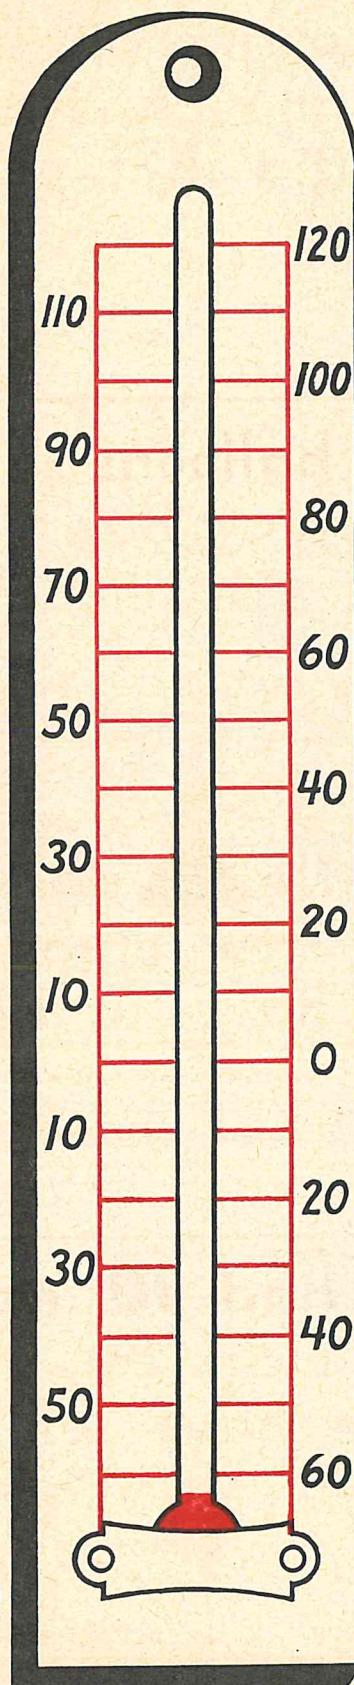

Dan had 10 marbles . He
lost 7 marbles . How many
did he have left ?

TEACHER. — The class should read this page orally.

A Thermometer

1. What is the temperature in this room?

2. Color the space in the middle of the thermometer to show what the temperature is. Color it red.

3. When it is hot, does the temperature go up or down?
up down

4. When it is cold, does the temperature go up or down?
up down

5. Draw a blue line to show what the temperature may be in July.

6. Draw a green line to show what the temperature may be in January.

A New Way to Add

3 and 2 are
and 2 are *think the answer*

3 and 2 are and 2 are *think the answer*

$$3 + 2 + 2 = \dots$$

2 and 2 are and 2 are *think the answer*

2 and 2 are and 2 are *think the answer*

$$2 + 2 + 2 = \dots$$

3 and 1 are and 2 are *think the answer*

3 + 1 are and 2 are *think the answer*

$$3 + 1 + 2 = \dots$$

$$\begin{array}{r}
 3 \\

$$\begin{array}{r} 5 \\ 3 \\ 2 \\ \hline \end{array}$$

$$\begin{array}{r} 2 \\ 6 \\ 2 \\ \hline \end{array}$$

$$\begin{array}{r} 2 \\ 1 \\ 7 \\ \hline \end{array}$$

A Shorter Way to Add

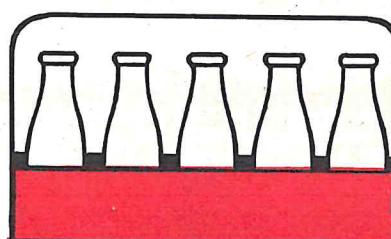

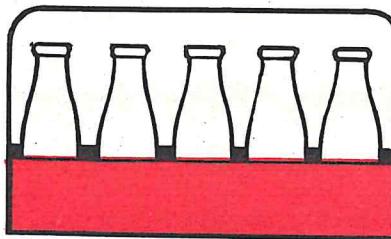

There are _____ bottles in each box.

There are _____ boxes of 3 bottles.

There are _____ 3's

3 and 3 are _____

two 3's are _____

There are _____ bottles in each box.

There are _____ boxes of 5 bottles.

There are _____ 5's

5 and 5 are _____

two 5's are _____

1 and 1 are _____

4 and 4 are _____

2 and 2 are _____

6 and 6 are _____

Two 1's are _____

Two 4's are _____

Two 2's are _____

Two 6's are _____

TEACHER. — Before doing this page, use objects to demonstrate the short way to combine groups of equal value. Children should use the words, "two 1's," "two 2's," etc.

Roman Numbers

Some books and some clocks use Roman numbers.

Remember these 3 Roman numbers.

I is I **5** is V **10** is X

Write these Roman numbers.

I _____ **5** _____ **10** _____

You can make other Roman numbers from these three Roman numbers.

Two I's are _____ 2 is made like this. II

Three I's are _____ 3 is made like this. III

One number before 5 is..... 4 is made like this. IV

5 is _____

5 and **I** are _____ 6 is made like this. VI

5 and two **I**'s are _____ 7 is made like this. VII

5 and three **I**'s are _____ 8 is made like this. VIII

One number before **10** is..... 9 is made like this. IX

10 is _____

10 and **I** are _____ 11 is made like this. XI

10 and two **I**'s are _____ 12 is made like this. XII

TEACHER. — Children should read this page orally. Develop the understanding that the three Roman numbers — I, V, and X — are arranged in certain ways and combinations to make all the other numerical values.

Roman Numbers

Write the Roman numbers.

1 _____
2 _____
3 _____

4 _____
5 _____
6 _____

7 _____
8 _____
9 _____

10 _____
11 _____
12 _____

Write the numbers for these Roman numbers.

VIII _____
V _____
I _____

X _____
II _____
IV _____

XI _____
VI _____
III _____

VII _____
IX _____
XII _____

Write the Roman numbers.

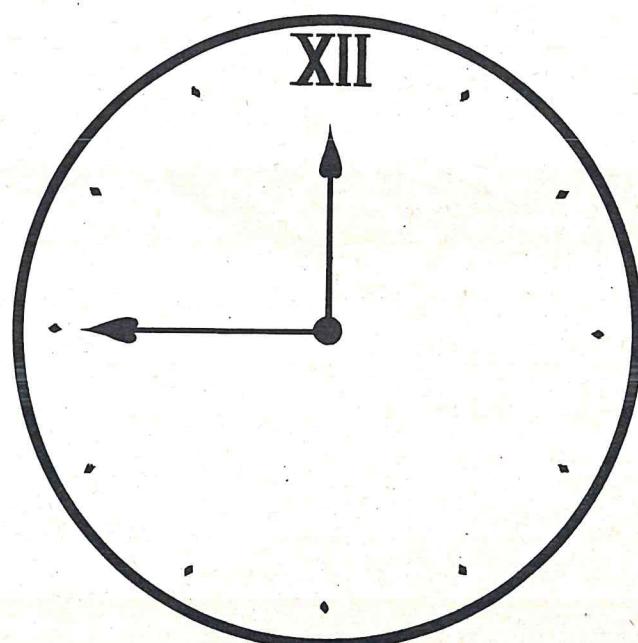

6 _____
11 _____
3 _____

12 _____
10 _____
1 _____

7 _____
5 _____
4 _____

9 _____
2 _____
8 _____

Write the Roman numbers on the clock.

Money

This is a penny.

This is a dime.

A dime is pennies.

10 pennies are dime.

10 pennies are ¢

=

5 pennies are 1 nickel.

1 nickel is pennies.

1 nickel is ¢

This costs ¢
..... nickel
..... pennies

This costs ¢
..... nickel
..... pennies

This costs ¢
..... dime
..... nickel
..... pennies

TEACHER. — Have the children read this page orally.

Money

Count these dimes by 10's.

10¢

¢

¢

¢

¢

¢

¢

¢

¢

Count these nickels by 5's.

5¢

¢

¢

¢

¢

¢

Count these pennies by 1's.

1¢

¢

¢

¢

¢

¢

¢

Sam has a nickel. He buys a balloon for 2¢. How much change does he get?

¢

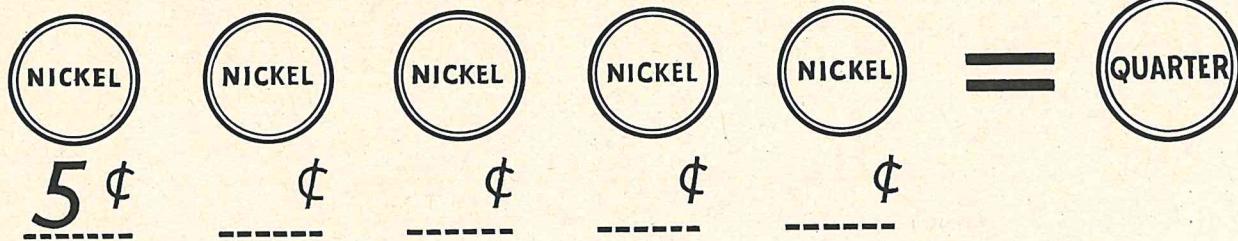

Mary has a dime. She buys an ice cream cone for 7¢. How much change does she get?

¢

TEACHER. — Have the children read this page orally.

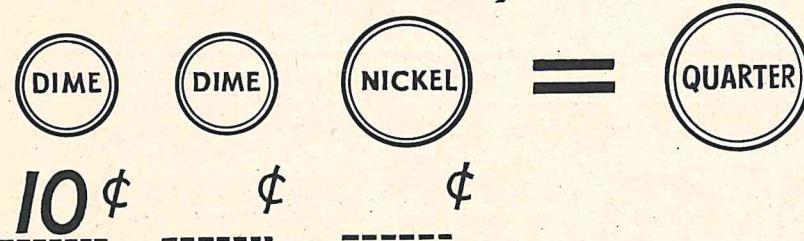

Money

Count this money.

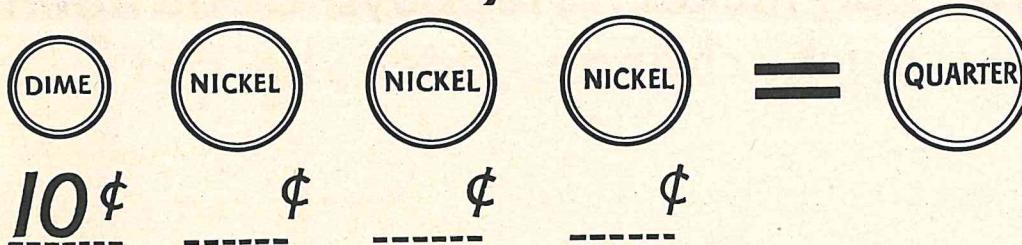

5 nickels make 1 quarter.
5 nickels are _____ ¢
1 quarter is _____ ¢

Count this money.

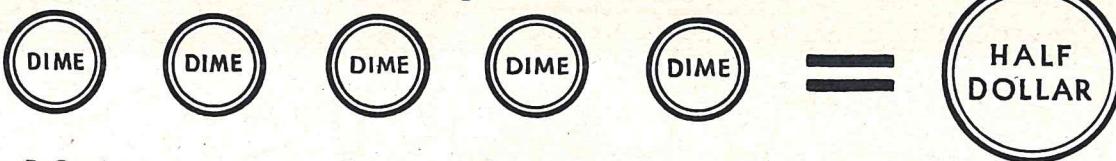

_____ dimes and _____ nickel = 25¢
_____ dimes and _____ nickel = 1 quarter.

Count this money.

_____ dime and _____ nickels = 25¢
_____ dime and _____ nickels = 1 quarter.

Count this money.

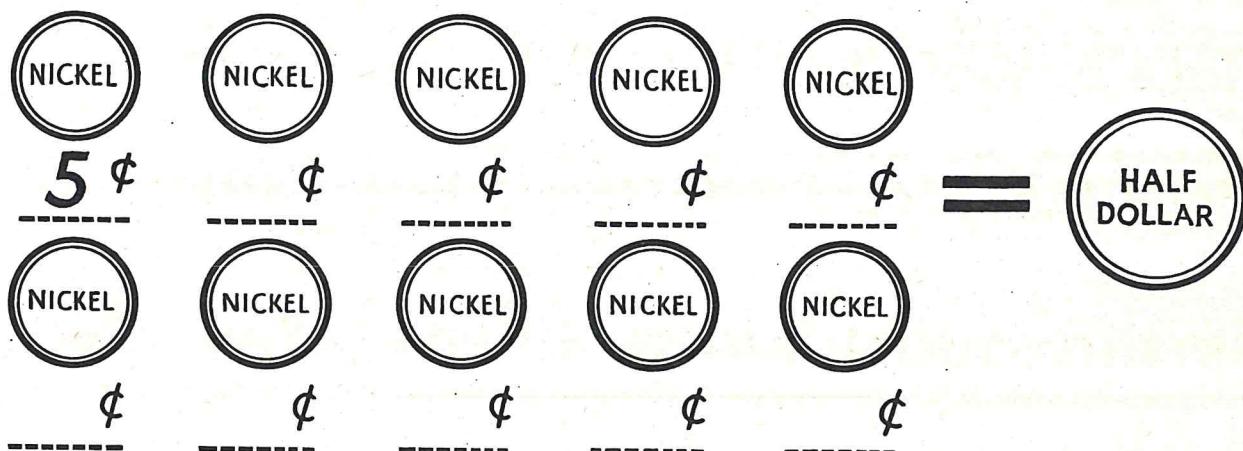

10¢ **¢** **¢** **¢** **¢**

5 dimes are _____¢

1 half dollar is _____¢

5 dimes make _____ half dollar.

Count this money.

10 nickels make _____¢

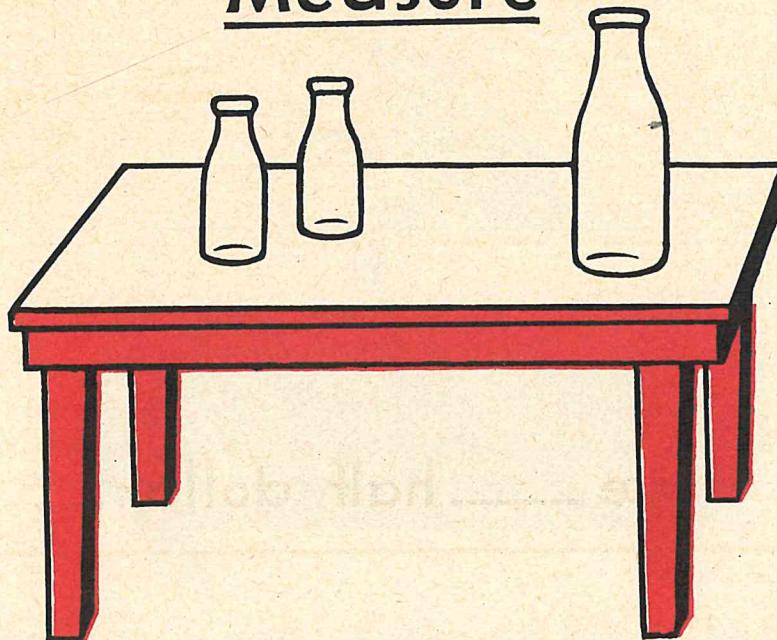

10 nickels make _____ half dollar.

John had 50¢. He spent 30¢. How much change did he get?

_____¢

Measure

Take a quart bottle and 2 pint bottles.
Fill one pint bottle with water.
Pour the water into the quart bottle.

Is the quart bottle filled? Yes No

Fill the other pint bottle and pour it into the quart bottle.

Is the quart bottle filled now? Yes No

How many pint bottles did you fill before the quart bottle was filled?

It takes _____ pints to make 1 quart.
1 quart is the same as _____ pints.

TEACHER. — The class should read this page orally. Let the children bring two pint bottles and a quart bottle to school and then follow the directions on the page.

Measure

Fill a glass with water and pour the water into the pint bottle.

Is the pint bottle filled? Yes No

Fill the other glass with water and pour the water into the pint bottle.

Is the pint bottle filled now? Yes No

How many glasses did you fill before the pint bottle was filled?

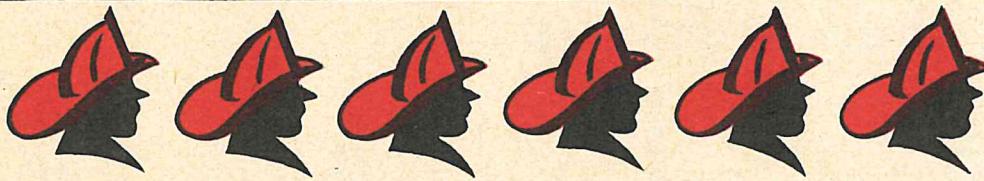

It takes _____ glasses to make 1 pint.

1 pint is the same as _____ glasses.

1 quart is the same as _____ glasses.

TEACHER. — Have the class read the page orally. Have glasses and pint bottle at hand. Let the children follow the directions on the page.

How Many?

Here are _____ firemen.

Draw a line around the first 2 firemen.

Draw a line around the next 2 firemen.

Draw a line around the last 2 firemen.

There are _____ 2's in 6

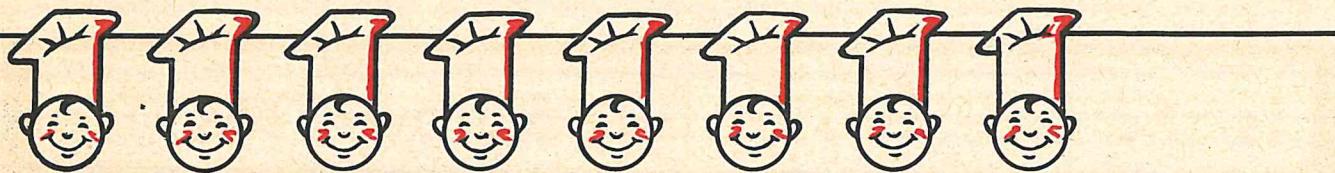

Here are _____ policemen.

Draw a line around the first 3 policemen.

Draw a line around the next 3 policemen.

Draw a line around the last 3 policemen.

There are _____ 3's in 9

Here are _____ cooks.

Draw a line around the first 2 cooks.

Draw a line around the second 2 cooks.

Draw a line around the next 2 cooks.

Draw a line around the last 2 cooks.

There are _____ 2's in 8

TEACHER. — Before doing the work on this page, the children should be given concrete objects to divide into groups.

Addition Test

Add down, then add up.

$$\begin{array}{r} 2 \\ 4 \\ 3 \\ \hline \end{array}$$

$$\begin{array}{r} 96 \\ + 92 \\ \hline \end{array}$$

$$\begin{array}{r} 42 \\ + 67 \\ \hline \end{array}$$

$$\begin{array}{r} 74 \\ + 32 \\ \hline \end{array}$$

$$4 + 6 = \underline{\quad\quad\quad}$$

$$2 + 8 = \underline{\quad\quad\quad}$$

$$7 + 0 = \underline{\quad\quad\quad}$$

$$3 + 6 = \underline{\quad\quad\quad}$$

$$3 + 7 = \underline{\quad\quad\quad}$$

$$0 + 8 = \underline{\quad\quad\quad}$$

$$5 + 4 = \underline{\quad\quad\quad}$$

$$2 + 7 = \underline{\quad\quad\quad}$$

$$1 + 6 = \underline{\quad\quad\quad}$$

$$5 + 5 = \underline{\quad\quad\quad}$$

Subtraction Test

Subtract, then add.

$$\begin{array}{r} 107 \\ - 26 \\ \hline \end{array}$$

$$\begin{array}{r} 97 \\ - 14 \\ \hline \end{array}$$

$$\begin{array}{r} 96 \\ - 85 \\ \hline \end{array}$$

$$\begin{array}{r} 109 \\ - 47 \\ \hline \end{array}$$

$$\begin{array}{r} 89 \\ - 72 \\ \hline \end{array}$$

$$\begin{array}{r} 106 \\ - 92 \\ \hline \end{array}$$

$$\begin{array}{r} 109 \\ - 63 \\ \hline \end{array}$$

$$\begin{array}{r} 78 \\ - 23 \\ \hline \end{array}$$

$$\begin{array}{r} 109 \\ - 85 \\ \hline \end{array}$$

$$\begin{array}{r} 98 \\ - 75 \\ \hline \end{array}$$

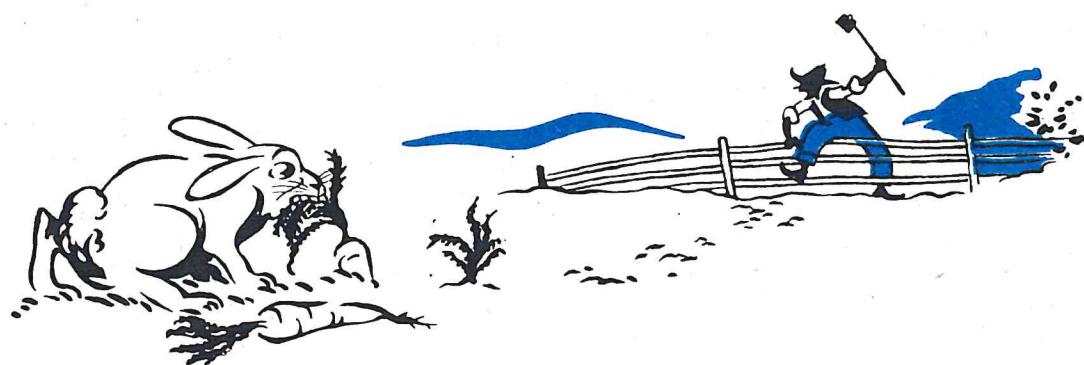

$$\begin{array}{r} 106 \\ - 74 \\ \hline \end{array}$$

$$\begin{array}{r} 169 \\ - 84 \\ \hline \end{array}$$

$$\begin{array}{r} 87 \\ - 73 \\ \hline \end{array}$$

$$\begin{array}{r} 107 \\ - 10 \\ \hline \end{array}$$

$$\begin{array}{r} 108 \\ - 32 \\ \hline \end{array}$$

2 from 10 = _____ 6 from 10 = _____

4 from 9 = _____ 4 from 8 = _____

8 from 16 = _____ 3 from 10 = _____

0 from 8 = _____ 7 from 9 = _____

8 from 9 = _____ 6 from 7 = _____

More Things to Do

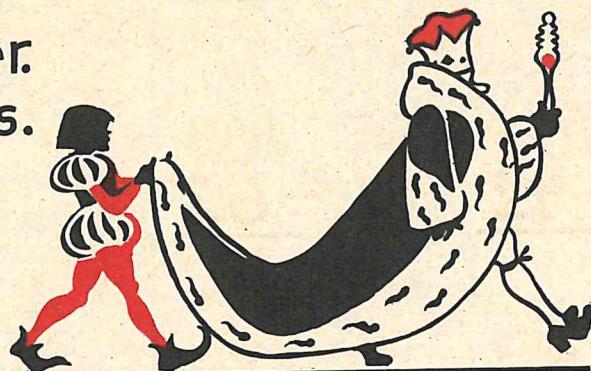

1. Use a ruler.

Measure this book.

Measure your desk.

Measure some paper.

Measure other things.

2. Use a scale.

Weigh some coffee.

Weigh some sugar.

Weigh some potatoes.

Weigh other things.

How much do you weigh?

3. Go shopping for your mother.

Find out how much things cost.

Pay for them.

Count your change.
